At Ahearn & Soper, “We are ‘Serious about Security!’”

The Future Belongs to Network Cameras ...

... It’s Cost-Effective and Future-Proof!

Regardless of the type of system you need or the size of your installation, Ahearn & Soper Inc. specializes in IP Network Cameras and installation. We can build a solution customized to your business needs.

You can protect your facilities and your employees with a state-of-the-art surveillance system. We use Lenel Network Video Recorders and software to provide managed recording and viewing functions. IP or Network Cameras provide a host of features and capabilities that are simply not available on analog cameras. Bi-directional Audio, high quality images of moving objects are just some of these advanced features.

Network-based Video Surveillance is more flexible and less expensive to install than older Analog Technology; Expanding network systems is simpler and more cost effective.

We have successfully installed camera systems in Airports, Hospitals, Schools and Colleges as well as Municipal facilities.
